About

Haneul Yoo is a Ph.D. candidate advised by Professor Alice Oh in the School of Computing at KAIST. Her research interest primarily lies in the field of natural language processing and machine learning. Her ultimate goal is to bridge the gap of communication among different cultures and languages with the help of large language models (LLMs). In particular, she is dedicated to (1) data-centric and multilingual NLP and (2) LLM-driven education innovation. She has worked on boosting communications of non-native speakers by (1) enhancing the performances of LLMs, especially in low-resource languages, through the release of datasets and benchmarks and (2) assisting their language learning through LLM-driven education innovation.
